

AQUACLEAN® TECHNOLOGY

ADVANCED UPHOLSTERY PROTECTION

Aquaclean® means that even the most stubborn stains can be removed easily JUST WITH WATER. The Aquaclean® Technology used in this upholstery fabric helps destroy the majority of stains with just water, without having to resort to professional cleaning.

WHAT IS AQUACLEAN?

The Aquaclean® treatment system covers every single fibre with an invisible molecular coating. This helps to prevent dirt penetrating the fabric's fibres. Stains are easily removed by just applying water with a paper towel or a microfibre cleaning cloth.

CARE & MAINTENANCE

Vacuum regularly and remove dust particles with a damp microfibre cloth, this will help to prolong the life of the fabric and keep it fresh looking.

STAIN REMOVAL

This is how Aquaclean® technology works:

- Remove excess liquid or particles from the surface of the fabric
- Dampen the stain by applying water with a paper towel or a microfibre cleaning cloth.
- Rub the stain softly in circles to remove the stain

The information contained in this Care Guide is for guidance only. Geometric Fabrics Limited do not in any way guarantee against all types of staining, soiling or marking.
